EDUCATION

Karpagam Institute of Technology

B.E. Electronics and Communication

2023 – 2027

Coimbatore, India

SUMMARY

I'm a Software Engineer passionate about solving real-world problems. Few of my key strengths are the value I bring through clear documentation, knowledge sharing, and taking ownership and responsibility for the work I do. I've invested considerable amount of time in strengthening my DSA skills and building scalable web solutions.

PROJECTS

AI Interview Evaluation System | CrewAI, Gemini-2.5-Flash, Selenium, FAISS

2025

- Designed and developed an autonomous AI-driven interview evaluation platform with dynamic follow-up questioning, context retention, and realtime candidate interaction.
- Built a multi-agent orchestration pipeline using CrewAI involving an Orchestrator Agent, Questioning Agent, and Evaluation Agent for interview flow management and candidate assessment.
- Implemented low-latency socket-based STT streaming and TTS pipeline to improve realtime conversational experience and FAISS for keyword matching.
- Structured the system using microservice architecture principles for modular scalability, independent service communication, and easier deployment.

Automated SQL Examination Platform | Electron, MERN, MySQL

2024

- Developed a cross-platform SQL examination platform using Electron and MERN stack to conduct scalable, offline-capable inter-college database assessments over local networks.
- Designed a proctoring UI.
- Implemented firewall-based network access control rules during test initialization to restrict unauthorized internet and external network communication.
- Integrated Electron IPC-based communication architecture to coordinate frontend and backend operations efficiently in a desktop environment.

TECHNICAL SKILLS

Languages: C , C++ , JavaScript , Python

explored : LLD , HLD , Database design , MERN , electron.js , LangChain , MCP , MYSQL , vector databases , Manifest V3 Extensions , Git , antiGravity , Computer core fundamentals , DSA , Deployment foundations(AWS) , Docker basics , Microservices basics .

EXTRACURRICULAR

- Institute Topper at ICPC 2025
- Campus Ambassador for Adya AI
- Participated in Adya MCP Hackathon; learned MCP and tool calling and got recognition for best performance
- Competed in Adya Agent Building Contest and got recognition
- Secured 2nd place in inter-college DBMS design and query event “Fundas Fiesta”

CERTIFICATIONS

- Full-Stack (MERN) – LinkedIn
- SQL (Advanced) – HackerRank
- Cisco Networking Essentials
- Cisco IT Support
- IBM Design Thinking

Proof of certifications and related work/code are available on the GitHub and LinkedIn profiles provided above.
